

Aircraft Handheld 3 gallon Portable Commercial grade sprayer Part #: S33HP.

High density polyurethane, controlled pressure sprayer designed specifically to spray hot SAE Type 1 De-icing fluid directly onto an aircraft to remove frost and light snow and ice. This sprayer has an all brass 2 pc interchangeable wands with either 18 or 24 inch reach, flat fan spray pattern with brass tip that sprays 1 gpm of de-icing fluid. It can accommodate a 120 volt Immersion Heater to heat the fluid for better de-icing efficiency.

Features

- Heavy duty brass flow control lever and wand to resist breaking in low temperatures
- Translucent tank provides easy viewing of fluid levels and a 4" wide mouth opening for easy filling
- Lock On feature for constant spraying
- Pressure relief/release valve built into the tank
- All Viton seals
- Convenient wand docking clip
- Brass wands: 18" curved. 24" straight. Use alone or together.
- Brass nozzle: flat fan spray pattern, 1 gpm flow rate
- Hose length: 42"
- Spray stream: 24 feet
- Shoulder Strap
- Product dimensions/weight: 7.5 Dia x 25 H, 4.9 lbs
- Shipping dimensions/weight: 25 x 9 x 9, 7 lbs

Accessories

Part #: IH-HS3HP 120 volt, 1700 watt Immersion Heater

Electrical immersion heaters quickly heat fluid within the sprayer Tank to provide better de-icing efficiency. These heaters can be used indoors or out, may be plugged into a standard 3-prong grounded household outlet, and will heat and maintain the de-icing fluid to a factory-set 120F.

Part #: PB-3HP Insulated Wrap

Custom insulated weather tight wrap specifically designed for our 3 gallon sprayer to help keep fluids hot giving you more time to de-ice your plane.

Part Number	Product Description	Price
S33HP	Handheld Portable De-icing Sprayer, 3 gallon	\$ 180.00
IH-H3HP	Immersion Heater 120v, 1700w	\$ 875.00
