

C25PS-D De-icing/Anti-icing Cart

- Cart mobility provided by hand, ATV, tractor, etc.
- Heavy Duty Steel Channel frame with 5" swivel caster nose wheel.
- 12 volt diaphragm pump w/ pressure demand switch
- Factory set pressure demand switch: 50 – 60 psi.
- 120 volt, 2000w Immersion Heater
- Pressure gauge (0 - 100 PSI)
- 25 gallon corrosion resistant Polyethylene tank
- 25' of 3/8" ID high pressure hose
- GunJet handgun with 24" brass extension
- 16 x 6.5 -8 Pneumatic Turf Tread tires
- 90 day warranty

The **12-Volt Electrically Powered Carts** are appropriate for either indoor or outdoor use. These carts use a small 12-volt, 3-chamber diaphragm, non-circulating pump with a demand pressure switch that provides fluid flow rates of up to 4.5gpm/60 psi. The cart is equipped with an electric immersion heater to heat the de-icing fluid to a maximum of 140°F to help melt frost, snow & ice from your aircraft's surfaces. All carts are supplied complete including a steel frame, immersion heater, two Turf Tread Tires, pump, tank, pressure gauge, temperature gauge, 25' high-pressure hose, deluxe pistol-grip handgun, and brass nozzle. The on-board charging and battery system makes these units completely self contained.

Product Details

Tank Capacity	25 gallons
Tank Material	Corrosion-Resistant Polyethylene Tank
Heating Element	2000w 12 volt Immersion Heater
Pump Type	Diaphragm
Pump Amps – Max	7.0 Amp
Pump output - Max	4.5 GPM
Pump Pressure -	60 PSI Max pressure
Max Sprayer Gun	High-Pressure Deluxe Pistol-Grip
Immersion Heater	Handgun 120 volt, 1400 watt
Main Tires	16 x 6.5 -8
Nose wheel	5" swivel caster
Hitch	24" steel tow bar with pintel ring
Self Containment Kit	On-board Battery and Battery Charger
