C40GPS De-icing Cart

40 gallon de-icing cart with a Honda 5.5 HP engine, 2000 watt immersion heater, temperature gauge, nose wheel, and tow bar.

Our gas powered 40 gallon cart is designed for outdoor de-icing operations. This cart uses a 5.5 HP air-cooled gasoline engine, providing adjustable fluid flow rates and pressures of up to 7 GPM/150 PSI, sufficient to de-ice all general aviation, corporate & charter aircraft. The cart is equipped with an electric immersion heater to heat the de-icing fluid to a maximum of 140°F to help melt frost, snow & ice from your aircraft's surfaces.

All carts are supplied complete, including steel frame, 40 gallon polyethylene tank, 5.5 HP Honda gas engine, immersion heater, temperature gauge, pump, adjustable pressure value, pressure gauge, 25' high-pressure hose, deluxe pistol-grip handgun with 24" brass extension and brass nozzle, hitch bracket, main wheels, nose wheel and tow bar.

Product Details

Tank Capacity	40 gallons
Tank Material	Corrosion-Resistant Polyethylene Tank
Engine	Honda 5.5 HP
Pump Type	6-Roller Cast Iron Pump
Pump Output	7 GPM
Pump Pressure	150 PSI Max Pressure
Immersion Heater	120 Volt, 2000 Watt,
Max fluid temp	140°F
Hose	25 LF 3/8" High Pressure Hose
Sprayer Gun	High-Pressure Deluxe Pisto-Grip Handgun
Main Tires	16 x 6.50 -8, Turf Tread
Nose Wheel	5" Swivel Caster
Hitch	24" Tow Bar with Pintel Ring
